- Release**
- TestFlight / App Store Connect / Google
Play Console / Build Signing
- Web/Backend**
- React.js / Node.js / HTML / CSS

EDUCATION

- Allama Iqbal Open University**
- Bachelor of Business Administration (BBA)

PROFESSIONAL SUMMARY

React Native engineer with 5+ years of hands-on experience taking mobile apps from messy ideas to shipped iOS and Android products. I currently lead a 3-person mobile team at OPUS GEEKS while still owning code, architecture, releases, and production fixes.

Strongest in product-focused mobile work: clean React Native/TypeScript code, Firebase, subscriptions and payments, maps, notifications, authentication, app performance, and App Store/Play Store release cycles.

CAREER HIGHLIGHTS

Led 15+ published mobile apps across App Store and Google Play	Manage code review, task breakdown, mentoring, and release readiness for a 3-developer team	Hands-on with Stripe, Apple IAP, Google Play Billing, Firebase, maps, geolocation, and push notifications
--	---	---

EMPLOYMENT HISTORY

- Team Lead React Native Engineer** OCT 2024 - PRESENT
OPUS GEEKS
- Lead a 3-developer React Native team delivering client apps with weekly planning, PR review, technical direction, and unblock sessions.
 - Own mobile architecture decisions across navigation, reusable UI, API structure, auth, Firebase services, notification flows, and release builds.
 - Delivered production apps with real business features: subscriptions, Stripe payments, Apple IAP, Google Play Billing, maps, geolocation, camera flows, and push notifications.
 - Handle release work through TestFlight, App Store Connect, and Google Play Console, including build signing, store metadata, review feedback, and hotfixes.
 - Shipped and maintained apps including Receipts to Riches, Fence Space, Wedstimate, Clean N Sober, EyeQ, and Cruisimity.
- Senior Software Engineer** OCT 2023 - OCT 2024
Instant Solutions Lab
- Built production React Native features with TypeScript, Redux Toolkit, reusable components, and modular screen structure.
 - Integrated Firebase, REST APIs, authentication, push notifications, deep links, and third-party SDKs across multiple app modules.
 - Improved user-facing flows by tightening loading states, error handling, form validation, API failure handling, and navigation edge cases.
 - Worked closely with designers, backend engineers, and QA to turn vague requirements into stable mobile experiences.
- Software Engineer (React Native / React.js)** FEB 2023 - OCT 2023
Regex Dot Private Limited
- Developed mobile and web features using React Native, React.js, JavaScript, and component-based UI patterns.
 - Connected REST APIs, authentication flows, forms, and state management while keeping screens maintainable and easy to extend.
 - Collaborated with senior engineers on debugging, refactoring, and improving UI consistency across customer-facing flows.
- JavaScript Developer** JAN 2022 - FEB 2023
Strugbits
- Started as a JavaScript-focused frontend developer building React.js interfaces, reusable components, and responsive layouts.
 - Connected REST APIs, handled frontend state, fixed UI bugs, and learned production delivery habits through real client work.

FEATURED APPLICATIONS

Receipts to Riches Receipt rewards app with production mobile flows, Firebase-backed features, and store release ownership. Published on Apple App Store and Google Play Store App Store Play Store	Fence Space Marketplace-style mobile app with authenticated user flows, APIs, and iOS/Android delivery. Published on Apple App Store and Google Play Store App Store Play Store
Wedstimate Wedding vendor marketplace covering discovery, vendor flows, payments, messaging, and release support.
